

What you should know about me

I grew up with a fascination for photography, and went around with my little camera taking pictures of everything I was involved with. Then, after starting college with the intention of going to medical school, I had a roommate who was studying art, and I found out that I had an artist inside of me. I graduated

from the University of Michigan School of Art with a BS in Art, and a major in photography. And that was the beginning. Maybe the most important thing about me is that I haven't stopped learning. After having done photography for more than twenty years, I still find exciting new ways to make images that tell stories and evoke emotions. I have become a real expert at photoshop, and have found endless creative ways to work with my (your) images. My commitment to quality is evidenced by my choice to maintain a 2500 sq ft studio, and to use Canon's most expensive and highest quality cameras and lenses (we use the latest versions of the 1Ds and 5D bodies, and the L Series lenses). We make all your prints in-house on Epson's top of the line large-format giclee printers. Also, very importantly, I have a real talent for working with people. I will help you relax and let your personality show in front of my camera ... your smiles will be real, not just put on. On your wedding day I will enjoy working with you, and you will enjoy having me and my staff at your wedding.

Sample Wedding Packages
